

We are looking for a mid-level UX specialist.
This is a 6 months position with a potential to extend into a permanent role.

WHAT DO WE DO?

Large structures are hard to build, but even harder to monitor, inspect and maintain. At TRIK, We believe that drones are the future of structural inspection. We want to enable everyone to be able to utilise drones in the easiest way possible.

TRIK is a drone software start-up that has been established for 3 years. We turn drone photos into digital 3D models and enable customer to make comment in 3D. You can use the 3D models as a file directory to store data, compare changes or add measurement. We've won several awards for our innovative business solutions and funded by top tier investors like the UK government, and the Founder of Zoopla. We're ambitious to do more and add to our product pipeline and solutions we offer our clients.

WHAT ARE WE LOOKING FOR?

We're looking for a UX/UI designer who won't compromise functionality for a great aesthetic look. Someone who enjoy the challenge of creating an intuitive interface for the end customer.

We prefer someone with >3 years experience of UX design. Bonus point if you have an experience in or knowledge of construction, project management, drones, property, engineering, architect, geospatial, map, or other related field.

You should be able to prototype quickly, adapt swiftly to code challenges, be able to work as part of a team, have strong communication skills and be straightforward and pragmatic in your approach.

WHAT WILL YOU BE DOING?

Most of your work (80%) will be in researching on customers and competitors to set out the strategy for our product. You will be working on a couple of things from Designing UX/UI for the app, webapp and landing page; Testing different theme (utilise existing theme that can be found online) with clients to see what would work best; to setting up a strategy for the customer acquisition.

You will be working directly with our CEO / Product lead and hand over the mock up of the UI to the Front end developer or past on the customer acquisition strategy to our marketing team.

Most of the web/app mockup will be from existing template/UI Kits. We prefer Sketch, but quite flexible if you want to create mockups in other software.

>> If you want to expand the scope and work on something else as well (eg. Video, marketing, front end dev., etc.), please do let us know.

WHY US?

We're a small team so you will be an integral part of the development team, creating and iterating our code base. We'll be looking to you to help us continue to innovate and grow our products, which will include the future automated real time 3D mapping and drone controlling software.

This is a great opportunity to join a rapidly growing start-up business, you'll make a difference from the day you start with us. We offer the standard benefits you'd expect, including a pension scheme, 25 days holiday and the opportunity to purchase share options as well as a creative and flexible work environment where you can do your best work.

You can choose to either grow with us as a developer or step up to manage the team. We have a structure to support both career path.

If you're interested in joining the Gettrik team take a look at our website www.gettrik.com and what we do <https://m.youtube.com/watch?v=9o90MZZCDYk#> and get in contact with us at contact@gettrik.com
